Abstract

本文为使用 Pandoc 将 LaTeX 输出为 .html 并部署到博客的记录。

Before the beginning

> One should install Pandoc first,
> And LaTeX environment.

1. Pandoc

Pandoc is an "Universal markup converter", which a Haskell library for converting from one markup format to another, and a command-line tool that uses this library. For more information: pandoc in Github

2. LaTeX to .html

Pandoc example

```
pandoc math.text -s -o mathDefault.html
pandoc math.text -s --mathml  -o mathMathML.html
pandoc math.text -s --webtex  -o mathWebTeX.html
pandoc math.text -s --mathjax -o mathMathJax.html
pandoc math.text -s --katex   -o mathKaTeX.html
```
